EXPERIENCE

bet365 — Senior Software Engineer

Denver, CO | June 2025 – Nov. 2025

- Designed and built event-driven Go microservices handling 6B+ requests/hour using Kafka, Kubernetes, GCP Spanner, and Valkey for core U.S. sports betting platform.
- Led architecture design and implementation in Go during rapid team scaling from 20→80 engineers.
- Owned critical service recovery, refactoring a core Go service to resolve memory leaks and improve production stability.
- Mentored junior engineers on Go best practices, distributed systems design, and cloud-native architecture patterns.

Twilio SendGrid — Senior Software Engineer

Denver, CO | Mar. 2021 – Sept. 2024

- Architected and implemented OAuth 2.0 and OpenID Connect (OIDC) federated authentication system in Go, enabling secure SSO across SendGrid and Twilio platforms.
- Led cross-platform identity integration, collaborating with security and identity teams to deliver enterprise-grade authentication infrastructure.
- Migrated on-premises Go microservices to AWS, designing for high availability and scalability using Lambda, DynamoDB, SQS, and SNS. • Built Go-based REST APIs for billing and compliance systems supporting Fortune 500 clients.
- Designed and maintained account management and billing infrastructure using Go, AWS, and Terraform with infrastructure-as-code practices.

Twilio SendGrid — Software Engineer II

Denver, CO | Apr. 2019 – Mar. 2021

- Built and maintained highly available RESTful services in Go on AWS using serverless architecture (Lambda, DynamoDB, SQS, SNS).
- Drove SOC2 and GDPR compliance through secure system architecture and data governance implementations.

Twilio SendGrid — Software Engineer I

Denver, CO | Sept. 2017 – Apr. 2019

- Re-architected legacy monolithic signup and login systems into cloud-native Go microservices on AWS.
- Migrated on-premises infrastructure to AWS using Go, Terraform, and infrastructure-as-code practices.
- Improved user conversion through data-driven A/B testing and experimentation.

Additional Experience

Software Engineer Intern, Twilio SendGrid (2017)
Global Pricing & Marketing Intern, Level3 Communications (2016–2017)
Hosting Architecture Intern, Forsythe Security Solutions (2016)

EDUCATION

University of Denver — B.S. in Computer Science, 2017
Minors: Mathematics, German Language & Literature

AWARDS

- Cyphercon Cypher Capture the Flag Competition – Lifetime Badge Winner, 2024
- Magic Owl Award – Superior Execution, Twilio, 2019
- 1st Place – ETHDenver Aragon dApp Hackathon, 2018

KEY SKILLS

Languages: Go (8+ years), Python, Bash, SQL, JavaScript, React
Cloud Platforms: AWS (Lambda, DynamoDB, SQS, SNS, EC2, S3), GCP (Spanner, Kubernetes Engine), Kubernetes, Docker
Infrastructure: Terraform, Kafka, GitLab CI/CD, Buildkite, Jenkins, Chef
Distributed Systems: Event-Driven Architecture, Microservices, High-Scale Systems (6B+ req/hr), Performance Optimization
Security & Auth: OAuth 2.0, OpenID Connect (OIDC), SAML, Federated Authentication, SOC2, GDPR
Databases: DynamoDB, Spanner, MySQL, Valkey/Redis
